

Color-coded, disposable Arthroscopic Blades to fit the DYONICS® Power Shaver System.

Smith & Nephew disposable arthroscopic blades and burrs are offered in a wide array of options, including straight, curved, and rotatable in standard and long lengths. Diameter options include 3.5, 4.0, 4.5 and 5.5 mm blades and burrs. Standard blade lengths are 13 cm and long blades have an 18 cm working length.

ELECTROTHERMAL® Arthroscopy System offering surgeons the widest choice in RF tissue modification tools

The Smith & Nephew ELECTROTHERMAL Arthroscopy System is the most versatile RF system available, offering the widest range of probes for temperature control, cutting, and ablation applications. User convenience and efficiency are enhanced with single-use probes that include fully integrated cables and autoprobe recognition which automatically selects the appropriate power setting for each probe.
